

B30DMX Wall-mount 12-24v DC

4 channel DMX controller

B30DMX wall mount 4 channel DMX controller allows you to control RGB/DMX lights and single colour lights from the comfort of your own home. Control the speed and colour of the RGB/DMX lights by using the colour wheel. RGB/DMX lights and single colour lights can also be dimmed using the dimming wheel. Alternatively, RGB/DMX fittings can be set on a static colour using the mode key. There are 4 pre-set colour shows that can be achieved by using the mode key. B30DMX only works as a stand-alone product if the RGB/DMX light has a built in addresser. If the light fitting has no addresser a BVDMX-350 decoder is required
