

EHH1142 Cyclone Up/down Wall Light - Graphite - Warm White LED

The EHH1142 Cyclone wall light is a sleek and contemporary wall light constructed in die-cast aluminium with a modern graphite grey powder coated finish.

PHYSICAL DATA

The IP54 rated Gemini wall light measures 240mm long x 64mm high and 120mm wide. It is constructed from die-cast aluminium with a modern dark graphite grey powder coat finish. Illumination is provided by two 7 watt CREE warm white LED driven from its integral LED driver.

ELECTRICAL DATA

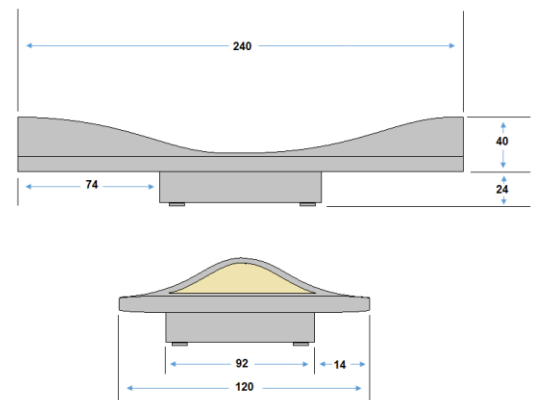

- 240v ac

INSTALLATION

Must be installed by a qualified electrician.

Unscrew two grub-screws that secure the base plate. Mark the fixing holes and remove the base plate. Drill the fixing holes and insert the two wall fixings provided. Secure the base to the wall using supplied screws, making sure the two O-rings and washers are fitted. Feed the power cable through the grommet on the rear of the mounting base. The use of T9990 sealant is recommended for effective seal around the cable entry and make the connection to the terminal block in the base of the lamp. Place the lamp over the base and secure using the two grub screws.

Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RC

COMPLIANCE & WARRANTY

- 2 year warranty
- CE / RoHS Compliant
