

EP4836- Spike8 garden spotlight - 12v - 8w - 640lm - 36° - 2700K - IP67 - Anodised Anthracite

Description

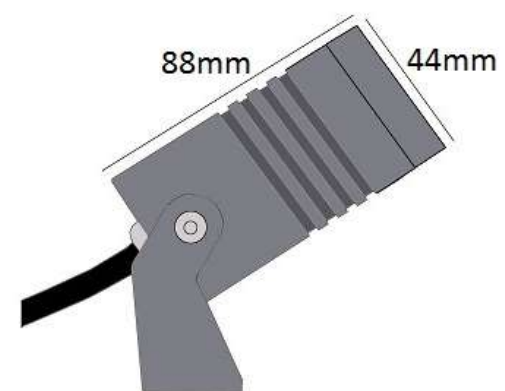

The Spike8 LED spike spotlight has a modern yet discrete anodised finish make it a suitable fitting for both modern and traditional garden settings. Powered from a 12v power supply, it makes the Spike8 LED spike spotlight a safe option, while making it more flexible than 240v fitting when the lights need to be relocated due to the changes in the garden caused by seasonal fluctuation. By removing the spike from the fitting, it can be mounted onto a pergola and used for spotlighting down on a subject.
