

E3111WWN- Elipta Navigator Minor - Stainless Steel - 12v - Warm White LED - Round

Description

E3111WWN is a 12v warm white LED recessed deck light which consumes a tiny amount of power and stays cool to the touch. The 0.3w LED produces a wide beam of light diffused by a 16mm diameter frosted lens. It is an idea to mark out the shape of a deck, patio or terrace, and to outline paths or provide marker lighting in step risers. To outline a deck or patio space with a distinctive shape, start at the corners of the decking or paving and space LED lights at about 60cm - 1m apart.

Electrical data	12v 0.3w 20lm 3000K. 1 metre 2 core HO5RN-F cable.
Colour/ Finish	316 grade Stainless Steel top.
Exterior Dimensions	Top 40mm diameter. Body length 47mm. sleeve 32mm x 70mm.

Installation guidelines

Navigator lights can be arranged in custom layouts using cable joint kits and 1.5mm cable, which is more flexible than kit-type products. Connect to the end of a low voltage cable using T9962 cable joint kit; for splicing into a run of cable use T9963 cable splice kit.

Do not use an electronic transformer to power Navigator LED lights. If powering from a 12v ac wire-wound transformer, ensure transformer is loaded to at least 75% of nominal rating.

2 YEAR WARRANTY

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials.
Corrosion due to exposure to salt or chlorine.
Damage due to incorrect installation practices.
Responsibility for 3rd party cost; indirect or consequential loss
