

## E4011 35mm Honeycomb Glare Louvre

E4011 Honeycomb louvre is a press fit filter that fits inside the front bezel of the Elipta Microspot range of spotlights to provide glare protection. It hides the light source from view outside the maximum 60° beam angle of the lamp.

### PHYSICAL DATA

35mm diameter x 3mm depth aluminium honeycomb.

### INSTALLATION

Remove bezel and press fit the filter into the bezel, pushing the filter all the way until it lays flush with the glass lens. Replace bezel having applied a thin application of copper grease to the threads, and ensuring the O ring is not pinched or stretched.

### COMPLIANCE & WARRANTY

- 2 Year warranty
- CE / RoHS Compliant
