

E4311L- Elipta Compact Outdoor Wall Downlight - Stainless Steel - 12v MR16

Description

E4311L Elipta Compact outdoor wall downlight is a 12v wall or post-mount model for fixed downlighting and grazing. 12v models operate from a remote transformer. These garden downlights take a range of Led lamps to achieve a variety of garden lighting effects. 3 watt lamps are usually ideal for downlighting from a pergola or grazing down a gate pillar; 5 or 7 watt wide beam lamps are often needed for downlighting onto a patio from positions higher up on the house wall.

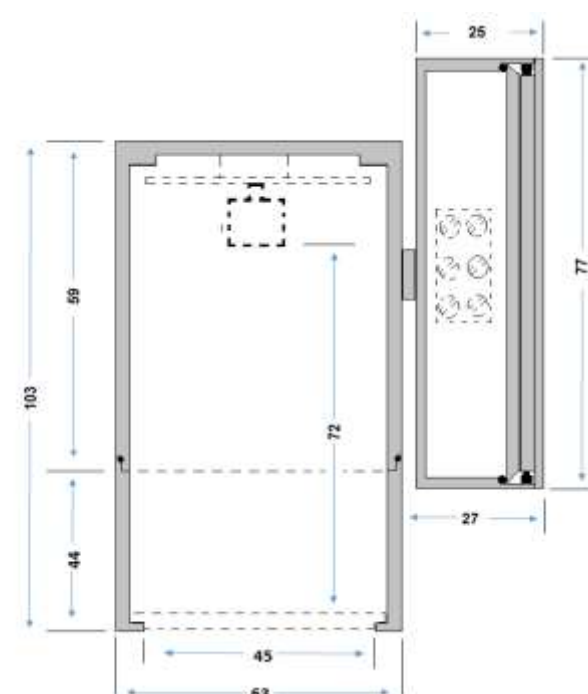

It has a flush lens which sheds water and dirt, and is easy to clean. Its smart stainless steel construction is a popular choice for modern garden settings. The E4311L can also be used as an uplighter.
