

EH8443LED-650 - Senatrix Bollard Light - Graphite

Description

Elipta Senatrix 240v bollard light has a built-in, downward facing, warm white LED, concealed in the top cap to create a unique 1.6 metre diameter circle of glare free lighting along paths, driveways and around decking and terraces. The Senatrix bollard may be bolted to paving or fixed to decking using anchors supplied. The anchors can also be set into wet concrete. For soft ground use the optional EHSENATRIX Ground Spike, (purchase separately).

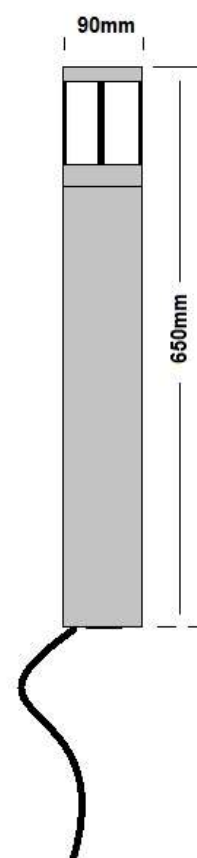

Colour/ Finish	Graphite Grey powder-coated pre-treated aluminium
Exterior Dimensions	650mm tall x 90mm diameter
Lumen output	426lm - 7w warm white 3000K
Input voltage	240v
Driver	Built-in PSU

Pre-wired with 2m HO5RN-F silicone core rubber cable for connection via T9969 underground joint kit: the installer may shorten the fitted cable to make a weatherproof connection inside the base of the light.

Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RCD. Where a garden lighting installation of more than 12 spike mount or recessed lights per circuit is proposed, we suggest the installation of 12v units with transformers, which results in a significantly higher fault tolerance and reliability in the total installation.

2 YEAR WARRANTY

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials.
Corrosion due to exposure to salt or chlorine.
Damage due to incorrect installation practices.
Responsibility for 3rd party cost; indirect or consequential loss
